-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3, 12-14 and 15-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Haroun et al (5,694,831).

Haroun teaches a cooking apparatus to cook food comprising a tray 28 with electrical heating means 36 (corresponding to the claimed heating plate), a power connection 46, a cabinet 10 supporting the plate, the plate being removable from the cabinet, and an upper cooking slot 40 for cooking food and also being a toaster, and at least one lever 30 and at least one power control device and a switch 48 controlling power to the at least one slot. Also, Haroun teaches a power control switch 32a to set a heat power of the at least one removable heating plate (28,36).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3742

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 4-6 and 21-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Haroun in view of Grove et al (4,413,173).

Haroun teaches substantially the claimed invention, but does not teach a heater coil, a contact terminal and a heater terminal. Grove teaches an electric toaster oven comprising heater coil 52, 54 and contact terminals 22 and 24. It would have been obvious to one having ordinary skill in the art to modify Haroun's invention to include a heater coil for better thermal efficiency and terminals in order to provide secured electrical contacts for the oven as taught by Grove (Col. 4, lines 9-20 and 45-55).

As for claims 22-24, it would have been obvious to one having ordinary skill in the art to have the body being bent along the edge and made out of heat-resistant insulation material, and also having the cooking apparatus a countertop cooling apparatus as a matter of design choice because applicant has not disclose the material and the countertop provides an advantage, used for a particular purpose, or solves a stated problem.

6. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Haroun in view of Constable (3,920,944).

Haroun teaches substantially the claimed invention, but does not teach a water drain. Constable teaches a cooking oven having a drain 32. It would have been obvious to one having ordinary skill in the art to modify Haroun's invention to include a water drain to discharge remaining water in order to preserve food taste during cooking as taught Constable (col.4, lines 25 -33).

Allowable Subject Matter

7. Claims 10-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
